

The 3M™ Water Filtration Products HC Series are designed to provide improved water quality and seamless erage service specifically for hot brewed beverages such as coffee, tea, espresso and hot chocolate.

The HC Series proprietary patented interconnect and head designs ensure the use of high-quality replacement cartridges, time after time.

The ramped interconnect completely disconnects the cartridge from the filter head with only a 1/4 turn, making this an extremely easy cartridge change-out.

Built-in valve allows cartridge changouts without shutting off the incoming water supply.

Choices of 1/4" or 3/8" John Guest connections are compatible with plastic and copper connections.

The integral mounting bracket makes installation quick and easy.

Sanitary quick change design allows for quick and easy cartridge change-outs and minimizes contamination of the filtration media.

A True Choice For Improved Water Quality

All premium-quality HC Series products provide:

- Chlorine taste and odor reduction — makes the difference you can taste
- Sediment reduction — improves beverage clarity
- Built-in scale inhibition — reduces unscheduled service calls
- Ensured system function without activation

Drinking Quality Water

Model HC151s

Capacity: 5,678 litres
Flow Rate: 2.8 lpm
3/8" John Guest Connections

Model HC351s

Capacity: 13,249 litres
Flow Rate: 3.8 lpm
3/8" John Guest Connections

Model HC111s

Capacity: 4,164 litres
Flow Rate: 1.9 lpm
Chemical Reduction
1/4" John Guest Connections

Model HC405GS

Capacity: 4,000 litres
Flow Rate: 1.9 lpm
Chemical Reduction
1/4" John Guest Connections

Features & Benefits

Patented carbon block technology

- Maximizes the effective life and chlorine reduction capability of the system while reducing fine particles associated with cloudy beverages.

1 micron multi-composite carbon block

- Helps reduce the health effects associated with filterable cysts

Scale inhibitor

- Helps reduce maintenance caused scale build-up

Maintenance Quality Water

Model HC355s

Capacity: 13,249 litres
Flow Rate: 3.8 lpm
3/8" John Guest Connections

Model HCS5s

Flow Rate: 7.6 lpm

Features & Benefits

5 micron Multi-composite carbon block (HC355s)

- Helps protect equipment from the effects of water conditions with heavy dirt load

Scale inhibitor

- Helps reduce maintenance caused scale build-up

Model	System Dimension (mm) w x d x h	Replacement Cartridge	Chlorine Taste / Odour	Scale Inhibition	Sediment Reduction	Cyst Reduction	Select Chemical Reduction*	Capacity (Litres)	Flow Rate (lpm)	Particle Reduction (Microns)
VH3-HC151s	91 x 120 x 220	HC151s	x	x	x	x		5,678	2.8	1

HCS5s	91 x 120 x 300	HCS5s		x				13,249	7.6	
VB2405GS	74 x 120 x 260	HC405GS	x	x	x	x	x	4,000	1.9	0.5

WARNING: Do not use with water that is microbiologically unsafe or of unknown quality with out adequate disinfection before or after the system. If system is not used for 2 days or more, flush 5-10 litres of water through before consuming water. Maximum cartridge life expectancy 12 months. Life and performance of cartridge may vary, depending on volume and quality of the incoming water supply.
